GL300 Temperature Data Logger MFM300 Accessory Kit

This self-powered, easy-to-use, Data Logger is a time and temperature logging device that is splash, dirt and impact-resistant. Used exclusively with the MFM300 Multi-Function Meter; the operator initiates a data logging mission, which flags upper and lower temperature limits and frequency of the readings. The Delay Start ability of this product is a useful feature, allowing the user to program a job at their office and account for time it takes to get to the job-site thus preventing erroneous temperature records. The Data Loggers record up to 2,048 temperature readings in selectable intervals from 1 minute up to 4 hours. Store up to 5 jobs on the MFM300 using the GL300. If more storage space is needed, the 9362 PC / USB connection cable (Sold Separately) allows the user to download information from the meter to a **FREE** PC Application called the MFM300 Toolbox. Store unlimited amounts of data, check for software updates, keep maintenance records, and much, much more!

Optional
9362 Connection Cable

Specifications

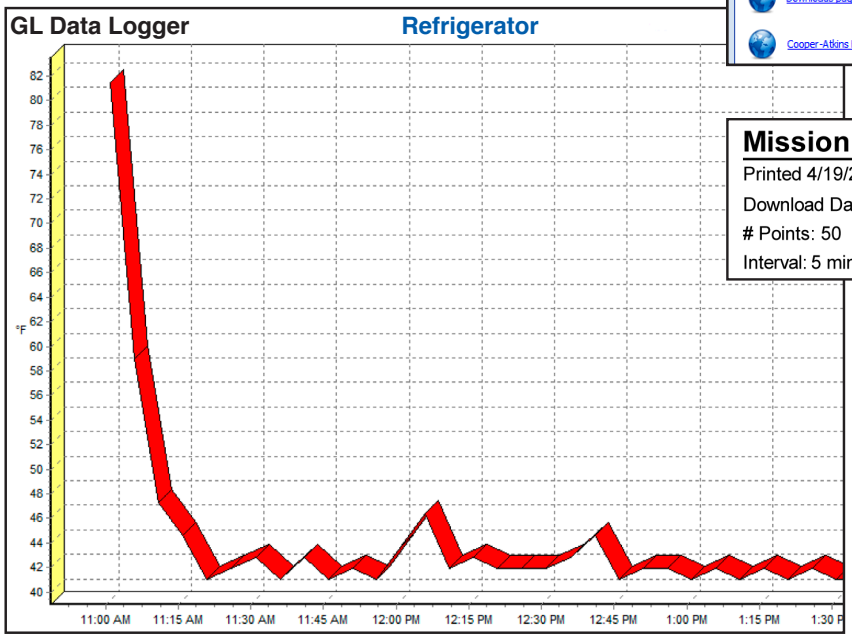

- Temperature Range: -40° to 185°F (-40° to 85°C)
- Accuracy: ±2°F (±1°C) from -4° to 176°F (-20° to 70°C)
- Water-resistant
- Plastic
- 1 Year Warranty

Packaging

- Weight: 4 oz (113 g)
- Package Dimensions: 5” x 1” x 4” (127 mm x 25 mm x 102 mm)
- Package Cube: 0.01
- 2 Data Loggers with wall mounts, reader cable and MFM adapter
